

The Incumbent Mayor of Brossard, Doreen Assaad, reiterates her demands for a local police station to enhance public security.

Here are the reasons.

Brossard, October 21, 2021 - Doreen Assaad, Chief of Brossard Ensemble and incumbent Mayor, is adamant that the city must have a police station on its territory. As Brossard will soon pass the 100 000 inhabitants threshold, this demand appears obvious to all the candidates of the Party, who also intend to implement additional security measures in each of the city's neighbourhoods.

"Since the very beginning of my mandate, considering the growth trends of the city, it became clear that we had to swim against the current, rather than in a reactive mode, to provide Brossard with a proper police station. We have made representations to the Agglomeration of Longueuil and to the Ministry of Public Security. We must maintain this demand, because sooner or later, all stakeholders will agree that this is the best option to guarantee the security of the citizens of a city of 100 000 inhabitants. So, why not think ahead as of now?", asks the outgoing mayor.

Although the police station is one of the major commitments of Brossard Ensemble, all of the daily concerns of the citizens will be taken into consideration and treated fairly. Among some of the concerns are the following: speeding mainly around school zones, safety in parks and pedestrian paths, respect of pedestrian crossings, as well as path and street lighting.

"The numerous citizen consultation forums and the door-to-door canvassing carried out by our candidates have enabled us to collect and update the list of citizens' needs. Each neighbourhood has differing issues that will need to be addressed. This is why we will work among several fronts", says the leader of Brossard Ensemble. "One of the avenues will be to review the effectiveness of the Circulation Committee so that the decisions made therein efficiently process citizen requests and feedback.

Public Safety, One Issue at a Time

Many comments have been made with regards to the safety of the city's multi-purpose trails. This is why Brossard Ensemble has included in its electoral platform infrastructure projects to widen several bicycle paths, while ensuring that pedestrian paths are separated from the bicycle paths. Awareness campaigns aimed at educating cyclists with regards to the 20 kilometres per hour speed limit on their dedicated lanes will also be deployed.

"As a party concerned with the promotion of active mobility and considering the diversity of available transportation options, it is important that transportation cohabitation

remain harmonious on the various pathways and streets. With these new measures, we are convinced that the network will evolve to meet the expectations of our citizens", adds the Chief of Brossard Ensemble.

It has often been reported that access to public restrooms in parks is a problem. Brossard Ensemble is committed to providing maximum and safe access to public restrooms throughout our various green spaces across the city.

"I have heard the concerns reported by the candidates in each district during their door-to-door campaigns. Our intention is to intervene quickly where possible and in the medium term, based on a specially designed intervention plan. We want families to feel proud of their neighbourhoods and we agree with them. Several candidates of Brossard Ensemble are parents of young children and others work with the youth. They are in a position to understand these concerns", says Doreen Assaad.

"Traffic circulation has always been a priority issue for all residents. You can count on me to ensure that regulations are better respected, for the safety of all citizens. For this reason, among many, the establishment of a police station is a must. Without a police station, it is like adding sections to your house without planning for the steps required to ensure the comfort of the inhabitants of the house," concludes the outgoing mayor.
